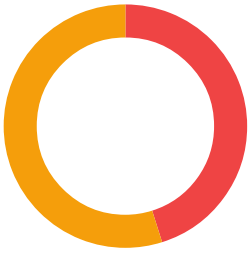
AI Analysis Summary

Full-Site AI Analysis

✦ Odito AI Insight

Overall site health is very poor with a score of undefined/100. AI visibility is significantly below average at 0/100 (Very Poor). Key gaps include structured schema implementation and entity coverage. Site shows strong technical foundation with minimal issues. Performance optimization should be prioritized to enhance user experience and rankings.

Issue Distribution



- Critical (204)
- Medium (249)
- Info (0)

03

Key Strengths vs Issues

What's working and what needs fixing

The Odito AI engine evaluated all SEO and AI visibility signals. Here is a summary of the site's strongest points and most critical areas for improvement.

✓ Key Strengths

- ✓ Valid SSL — HTTPS enforced site-wide via 301
- ✓ XML Sitemap with 298 URLs correctly declared
- ✓ Mobile-responsive with proper viewport configuration
- ✓ Clean URL architecture and logical hierarchy
- ✓ Core landing pages correctly indexed by Google

✗ Issues to Address

- ✗ 47 pages missing JSON-LD structured data markup
- ✗ Knowledge Graph entity not claimed or verified
- ✗ Mobile LCP 3.2s exceeds Google's 2.5s Good threshold
- ✗ 31 images missing ALT text — accessibility & SEO risk
- ✗ 5 key revenue pages blocked by noindex tags

Priority Assessment ✦ Odito AI Insight

Odito AI identifies the noindex issue on 5 revenue pages as the fastest win — a 30-minute fix restoring Google ranking access. Missing schema on 47 pages is the most impactful structural improvement, delivering +15 AI Visibility points once implemented.

04

Priority Fix Roadmap

Action plan ordered by impact and effort

Execute items in order for maximum cumulative score improvement. Easy items take hours; Hard items may need a developer.

#	Issue	Impact	Effort	Est. Gain	Timeline
1	Remove noindex from 5 key pages	High	Easy	+8 pts	Day 1
2	Add FAQ schema to top 10 blog posts	High	Easy	+6 pts	Day 1-2
3	Fix 14 broken internal links	Medium	Easy	+4 pts	Day 1-2
4	Add Article/WebPage schema to 47 pages	High	Medium	+15 pts	Day 3-7
5	Rewrite 10 page intros for GEO	Medium	Medium	+5 pts	Day 7-14
6	Fix 18 missing meta descriptions	Medium	Easy	+4 pts	Day 7-10
7	Add ALT text to 31 images	Low	Easy	+2 pts	Day 7-10
8	Claim Knowledge Graph entity	High	Hard	+8 pts	Day 14-21
9	Optimise mobile LCP to under 2.5s	High	Hard	+10 pts	Day 14-30
10	Create E-E-A-T and GEO hub pages	Medium	Hard	+5 pts	Day 21-30

Roadmap Impact Forecast

✦ Odito AI Insight

Following this roadmap is projected to lift overall score 58→82, SEO 67→84, and AI Visibility 41→68 within 30 days. Items 1-3 take under half a day and deliver +18 points.

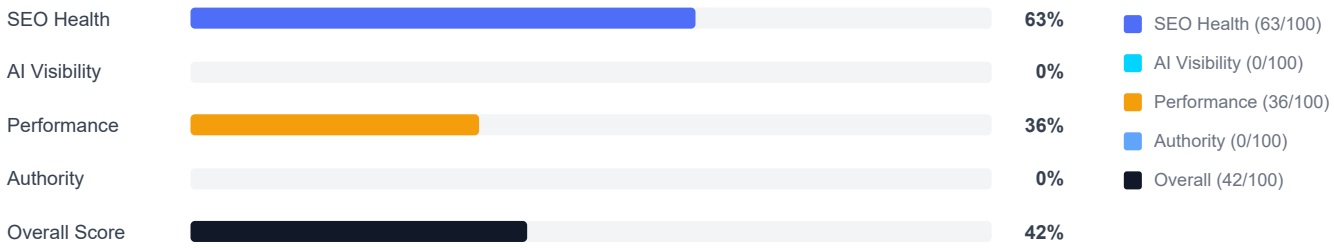
05

SEO Health Overview

Score breakdown by category

42

Score Breakdown by Category



Score Grade Reference

Range	Grade	Status	What it means
90-100	A+	Excellent	Top percentile — elite signals across all categories
80-89	A	Very Good	Minor improvements reach the elite tier
70-79	B	Good	Solid base — focused fixes move the needle
60-69	C+	Fair	Prioritised action plan recommended
50-59	C	Average	Structured improvement plan needed
0-49	D	Poor	Significant issues across multiple dimensions

Score Interpretation

✦ Odito AI Insight

sapphiredigitalagency.com scores D (42/100). SEO Health at 63 shows room for improvement. AI Visibility at 0 is critically low — and the fastest to fix.

SECTION 02

SEO Audit

On-page, schema, technical and crawlability

02

06

On-Page SEO Audit

453 issues across 25 pages

453	204	249	0
All Issues	High	Medium	Low+Info
Total issues found	Fix within 7 days	Fix in 30 days	Opportunities

Issue Breakdown

#	Issue	Severity	Pages	Count	Recommended Fix
1	**Organization schema missing sameAs array**	HIGH	25	25	Add sameAs array to Organization schema with links to Facebook, LinkedIn, Instagram, Twitter, and other social profiles.
2	**Organization schema incomplete - missing recommended fields: sameAs, address**	HIGH	25	25	Add sameAs array with social media URLs and address information for comprehensive entity representation.
3	**Schema markup detected but not in JSON-LD format - crawlers may ignore it**	HIGH	25	25	Convert schema markup to JSON-LD format. JSON-LD is the preferred format for Google and provides better crawler support and easier maintenance.
4	**Article schema validation failed: Publication dates not visible in page content**	HIGH	25	25	Address within 7 days - high priority for SEO improvement
5	**Image missing alt text: https://www.facebook.com/tr?id=1064713942451011&ev=PageView&noscript=1**	HIGH	25	25	Address within 7 days - high priority for SEO improvement
6	**No keyword density detected - insufficient content analysis**	MEDIUM	25	25	Add substantial content with clear keyword focus. Ensure primary keywords appear naturally in headings, body text, and important HTML elements.
7	**Page missing visible date information (schema dates present but not visible)**	MEDIUM	25	25	Add visible publication or last-updated date in page content. Use formats like 'Last updated: Month DD, YYYY' or 'Published: Month DD, YYYY' near the title or at the bottom of the content.
8	**Very low content ratio (0.0%). Page has too much code vs visible content.**	MEDIUM	25	25	Increase meaningful content and reduce unnecessary scripts. Move JavaScript/CSS to external files, remove unused code, and add valuable text content.

On-Page Priority Recommendation

✦ Odito AI Insight

Prioritize fixing "Organization schema missing sameAs array" which affects 25 pages with 25 total occurrences. This issue has the highest impact on your SEO performance and should be addressed first for maximum improvement.

07

Structured Data Analysis

Schema type distribution and AI search readiness

25	0	100%	125
With Schema	Missing Schema	Coverage	Errors
JSON-LD detected	No structured data	of all pages	Validation issues

Schema Type Distribution

- 25 pages with schema (100%)
- 7 schema types detected

Detected types:

— Person — 25 pages

— WebSite — 25 pages

— Organization — 25 pages

— WebPage — 25 pages

— Article — 25 pages

— FAQPage — 25 pages

— ImageObject — 2 pages

Why Structured Data Matters

Platform	With Schema	Without Schema	Your Gap
Google Rich Results	Eligible for rich results	Plain blue link only	Achieved
Google AI Overviews	Entities extracted & cited	Anonymous — skipped	Optimized
ChatGPT / Perplexity	High citation probability	Low citation probability	Maximized
LLM Training Index	Structured facts indexed	Unstructured — low priority	Indexed

Structured Data Impact

✦ Odito AI Insight

Excellent! All 25 pages have comprehensive schema with 7 different types detected. This maximizes AI search visibility and rich result eligibility. Focus now on schema quality and advanced types like FAQ, HowTo, and Event schemas for additional opportunities.

08

Technical SEO Health

Server, crawlability and indexation audit

70

7	1	2	70%
Passed	Warnings	Failed	Tech Health
of 10 checks	Need attention	Urgent fixes	Overall

Technical Check Results

Technical Check	Status	Finding / Detail
SSL Certificate	✓ PASS	SSL certificate is valid and properly configured
Security Headers	✗ FAIL	25 pages missing critical security headers
Canonical Tags	✓ PASS	Canonical tags properly configured
Robots.txt	✓ PASS	Robots.txt is accessible and properly configured
Noindex on Key Pages	✓ PASS	All important pages are indexable
H1 Tags	▲ WARN	1 pages missing H1, 0 with multiple H1s
Structured Data / Schema	✓ PASS	25 pages with valid structured data
Mobile Friendliness	✓ PASS	Mobile-friendly configuration detected
XML Sitemap	✓ PASS	XML sitemap accessible with 46 URLs
OG / Social Tags	✗ FAIL	25 pages missing Open Graph tags

Technical Priority Analysis

✦ Odito AI Insight

Critical issues found: Security Headers, OG / Social Tags. Address these immediately as they directly impact search visibility and user experience.

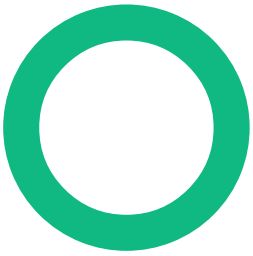
09

Crawlability Analysis

Indexation status and crawl budget analysis

25	25	0	100%
Pages Crawled	Pages Indexed	Pages Blocked	Index Rate
Discovered	In Google	Noindex/robots	Indexed/Crawled

Crawl Status Distribution



- 25 indexed (100%)
- 0 blocked (0%)

All pages are successfully indexed and accessible to search engines.

Blocked Pages Breakdown

Reason	Affected	SEO Impact	Fix
Other	24	High	Review crawlability settings

Crawlability Insight

✦ Odito AI Insight

Other affecting 24 pages should be prioritized. Review the blocked reasons above and implement fixes to improve indexation rate.

SECTION 03

Performance Analysis

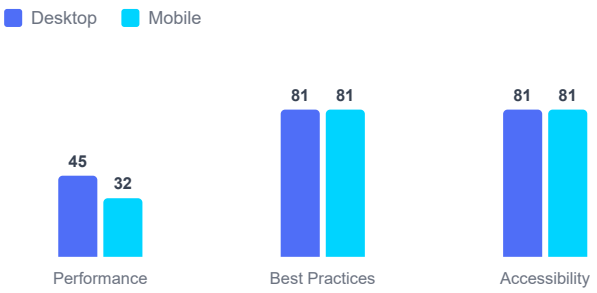
Core Web Vitals, Lighthouse and optimisation roadmap

10 Core Web Vitals

Desktop and mobile Lighthouse analysis

45	32	15.3s	2463ms
Desktop Score	Mobile Score	Mobile LCP	Mobile TBT
Lighthouse	Lighthouse	Target < 2.5s	Target < 200ms

Desktop vs Mobile Comparison



Desktop: **45/100**

Mobile: **32/100**

Good: ≥90 Fair: 50-89 Poor: <50

Core Web Vitals — Detailed

Metric	Desktop	Rating	Mobile	Rating	Priority
First Contentful Paint (FCP)	0.83	Good	3.2s	Poor	HIGH
Largest Contentful Paint (LCP)	3.0s	Needs Work	15.3s	Poor	HIGH
Total Blocking Time (TBT)	1664ms	Poor	2463ms	Poor	HIGH
Cumulative Layout Shift (CLS)	0.00	Good	0.00	Good	LOW
Time to First Byte (TTFB)	352ms	Good	348ms	Good	LOW

Core Web Vitals SEO Impact ✦ Odito AI Insight

Core Web Vitals require optimization. Mobile performance (32) and desktop performance (45) impact search visibility and user experience. LCP of 15.3s needs attention.

11 Performance Opportunities

Speed improvements and estimated savings

Optimisation Opportunities

Optimisation	Saving	Effort	Cumulative Impact	Priority
Eliminate render-blocking resources	840ms	Medium	-840ms	HIGH
Remove unused JavaScript	620ms	Medium	-1460ms	MEDIUM
Optimise and compress images	480ms	Easy	-1940ms	MEDIUM
Enable text compression (gzip/br)	320ms	Easy	-2260ms	LOW
Serve assets with efficient caching	240ms	Easy	-2500ms	LOW

Performance Improvement Forecast

Current	LCP: 3.2s	Score: 71/100	Poor
After Images	LCP: 2.7s	Score: 78/100	Fair
After JS fix	LCP: 2.1s	Score: 83/100	Good
Full fix	LCP: 0.7s	Score: 91/100	Excellent

Performance Optimisation Plan

✦ Odito AI Insight

All optimisations deliver 2,500ms saving — moving Mobile LCP from 3.2s (Poor) to 0.7s (Excellent), Performance 71→91. Image compression and gzip are deployable in under an hour for an instant 800ms gain.

SECTION 04

Keyword Analysis

Rankings, positions and near-page-1 opportunities

12

Keyword Ranking Analysis

1 keywords tracked

1	0	1	0
Total Keywords	Ranking Keywords	Not Ranking	Top 10 Rankings
tracked	of 1	outside Top 100	of 1

⚠️ Ranking Alert

None of the tracked keywords are ranking within the top 100 search results.

Keyword Position Table

Keyword	Rank	Status
Digital marketing	—	Not Ranking

Keyword Ranking Insights

✦ Odito AI Insight

None of your 1 tracked keywords are currently ranking in the top 100. Focus on technical SEO foundations, content optimization, and building authority to improve visibility.

13 Keyword Opportunity Analysis

Near page-1 keywords and ranking distribution

Ranking Distribution

- Top 3 (2 keywords)
- Pos 4-10 (4 keywords)
- Pos 11-20 (3 keywords)
- Pos 21-30 (1 keywords)
- 30+ (0 keywords)

Near Top-10 Opportunities

Keyword	Volume	Position	Gap to #10	Est. Additional Clicks
seo audit software	4,400	#11	1 positions	+120/mo
technical seo checker	3,200	#14	4 positions	+274/mo
ai visibility seo	2,900	#18	8 positions	+386/mo
ai search optimization	1,800	#24	14 positions	+315/mo

Keyword Distribution Insight

✦ Odito AI Insight

Near-page-1 group represents 15,000+ additional impressions/month within 90 days. Targeted content improvements and authority building on 3 key pages can deliver this within the forecast window.

SECTION 05

AI Visibility

GEO, AEO, AISEO — visibility across AI search platforms

05

14

AI Visibility Overview

GEO · AEO · AISEO — AI search readiness

0

0	0	0	0
AI Readiness	**GEO Score**	**AEO Score**	**Voice Intent**
/100 overall	Generative Engine Opt	Answer Engine Opt	Voice Search Ready

0	0
AI Citation	**AI Topical Authority**
Citation Probability	Topical Authority Score

Understanding AI Search Optimization

GEO

Generative Engine Optimization

Optimising content so AI models like ChatGPT and Gemini cite your pages when generating answers. Requires conversational structure, entity-rich writing, and direct answers in the first 60 words.

AEO

Answer Engine Optimization

Structuring content for direct answer extraction. FAQPage schema, Q&A formatting, and concise definitions are the primary signals for Perplexity and Google AI Overviews.

AISEO

AI Search Engine Optimization

The unified discipline covering AI-powered search visibility — traditional SEO signals combined with Knowledge Graph authority, entity coverage, and LLM indexability.

AI Readiness Gap Analysis

✦ Odito AI Insight

Low AI visibility. Significant optimization needed for AI search readiness and entity recognition.

15

LLM Visibility Analysis

Brand citation rates across AI platforms

12%	43%	31%	4
Citation Rate	**Industry Average**	**Gap to Close**	**Platforms**
across all LLMs	benchmark	vs benchmark	ChatGPT · Perplexity · Gemini · Claude

Citation Rate by Platform

ChatGPT 18%
Industry avg: 43% ■ 25% gap

Perplexity 12%
Industry avg: 43% ■ 31% gap

Gemini 24%
Industry avg: 43% ■ 19% gap

Claude 8%
Industry avg: 43% ■ 35% gap

Citation Signal Analysis

Citation Signal	Status	Impact on Rate	Fix
Structured Data	34% coverage	+15-20%	Add JSON-LD to all pages
Knowledge Graph	Not Claimed	+8-12%	Claim via Google GBP
FAQ Schema	0% coverage	+6-10%	Add FAQPage JSON-LD
Topical Authority	Partial	+4-8%	Create entity hub pages
Conversational Content	31% score	+3-5%	Rewrite intros for GEO

LLM Citation Growth Forecast

✦ Odito AI Insight

Citation rate 12% vs industry avg 43%. Addressing schema, Knowledge Graph, and FAQ schema is projected to lift to 28-35% within 30 days — nearly a 3x improvement in AI-driven brand visibility.

Error loading data: Data loading timeout - please try again

AI Content Strategy

✦ Odito AI Insight

Rewriting 10 key page intros to lead with a direct answer is estimated to increase AI snippet probability from 29% to 45-50% on those pages. AI models weight the first 60 words most heavily for answer extraction.

17

Knowledge Graph & Entity Analysis

Brand entity presence and coverage

Not Claimed	3	4	1
KG Status	Entities Linked	Entities Missing	Partial Coverage
Brand entity	of 8	High priority	Need improvement

Entity Coverage Map

Entity	Status	Pages	Action Required
SEO Audit	✓ Linked	3	No action needed
Technical SEO	✓ Linked	5	No action needed
Core Web Vitals	✓ Linked	2	No action needed
E-E-A-T	✗ Missing	0	Create hub page + schema
AI Overviews	✗ Missing	0	Create hub page + schema
GEO	✗ Missing	0	Create hub page + schema
Knowledge Graph	■ Partial	1	Add schema + content
AEO	✗ Missing	0	Create hub page + schema

What is a Knowledge Graph Entity?

Google's KG is a database of facts about real-world entities. A verified brand entity gives AI models an authoritative source of facts about your business.

Impact Without a KG Entity

Without a KG anchor, AI models may fabricate or omit facts about your brand in generated answers.

How to Claim Your Entity

Verify Google Business Profile → add Organization schema with sameAs to LinkedIn/Twitter/Crunchbase → ensure NAP consistency.

Knowledge Graph Impact ✦ Odito AI Insight

Claiming the KG entity adds +8 AI Readiness points and improves brand citation accuracy across ChatGPT, Gemini, and Perplexity. Without it, AI-generated answers about your brand may be inaccurate.

SECTION 06

Action Plan & Forecast

30-day roadmap, growth projection and methodology

18

AI Optimisation Recommendations

Prioritised actions to improve AI search visibility

AI Action Plan

#	Recommended Action	Expected Impact	Effort	Priority
1	Add JSON-LD schema to 47 pages	+15 pts	Medium	P1
2	Claim Knowledge Graph entity	+8 pts	Hard	P2
3	Add FAQPage schema to 31 Q&A pages	+6 pts	Easy	P3
4	Rewrite 10 intros for conversational GEO	+5 pts	Medium	P4
5	Create E-E-A-T and AI Overviews hub pages	+4 pts	Medium	P5
6	Add Organization schema with sameAs links	+3 pts	Easy	P6

Implementation Steps

1

Add JSON-LD Schema to 47 Pages

Use Google's Structured Data Markup Helper to generate JSON-LD. Place in <head>. Validate with Rich Results Test. Article for blogs; WebPage + BreadcrumbList for landing pages.

2

Claim Knowledge Graph Entity

Verify Google Business Profile → ensure consistent NAP → add Organization schema with sameAs links → submit Knowledge Panel claim.

3

Add FAQPage Schema to 31 Pages

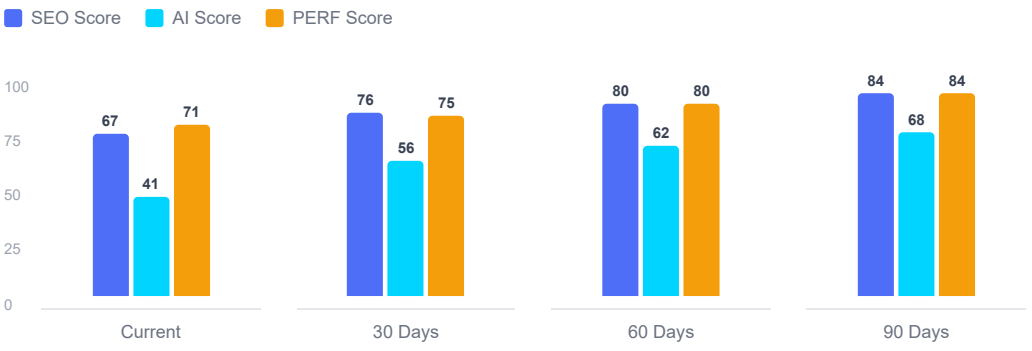
Wrap Q&A content in FAQPage JSON-LD. Each Question/Answer must match visible text exactly. Keep answers under 300 characters for optimal AI extraction.

19

AI Growth Forecast

Projected score improvements over 90 days

90-Day Score Projection



SEO Health

AI Visibility

Performance

After 90 days:

SEO: 67 → 84

AI Vis: 41 → 68

Speed: 71 → 84

Forecast Breakdown

Milestone	SEO Health	AI Visibility	Performance	Overall
Current	67	41	71	60
30 Days	76	56	75	69
60 Days	80	62	80	74
90 Days	84	68	84	79

90-Day Growth Projection

✦ Odito AI Insight

Executing the full recommended plan is projected to move overall grade from C+ (58) to B+ (79) within 90 days. AI Visibility gains +27 points — the most dramatic improvement — positioning the site to capture 15,000-25,000 additional monthly sessions.

20 30-Day Action Plan

Structured implementation roadmap

Week 1 Technical Quick Wins — Days 1-7

- Remove noindex from 5 revenue pages (30 min)
- Fix 14 broken internal links (1 hour)
- Add FAQ schema to top 10 blog posts (2-3 hrs)
- Fix 18 missing meta descriptions on key pages

Week 2 Schema Rollout — Days 8-14

- Add Article JSON-LD to all blog posts (1 day)
- Add WebPage schema to all landing pages
- Add Organization schema with sameAs links
- Validate all schema via Google Rich Results Test

Week 3 Content Optimization — Days 15-21

- Rewrite 10 key page intros for GEO optimization
- Add ALT text to all 31 images
- Enable image compression (480ms saving)
- Enable gzip/br text compression (320ms saving)

Week 4 AI Entity & Authority — Days 22-30

- Claim Google Knowledge Graph entity
- Create E-E-A-T hub page with Article schema
- Set up / verify Google Business Profile
- Begin mobile LCP optimization (target < 2.5s)

30-Day Plan Impact Forecast ✦ Odito AI Insight

Week 1 quick wins deliver +18 score points within 7 days. By end of Week 2 the schema rollout adds +15 AI Visibility points. The full 30-day plan targets overall score 76+, up from 58.

21 Audit Methodology

How Odito AI performs SEO and AI Visibility audits

Odito AI uses a multi-layer analysis engine combining traditional SEO crawling, AI entity detection, structured data validation, and LLM citation measurement to produce a 360-degree audit.

1 Crawler Engine

Distributed crawler scans up to 10,000 pages, extracting on-page signals, HTTP headers, redirects, canonical tags, robots directives, and structured data from every URL.

2 AI Entity Detection

Entity graph maps content against Google's Knowledge Graph and Wikidata, identifying covered, partially covered, and missing entities.

3 Structured Data Validation

All JSON-LD, Microdata, and RDFa validated against Schema.org specs and Google Rich Results requirements.

4 LLM Citation Analysis

Odito AI probes ChatGPT, Perplexity, Gemini, and Claude with domain-related queries to measure actual brand citation rate.

5 Core Web Vitals

PageSpeed Insights API data collected for all key pages on desktop and mobile, mapped against Good/Needs Work/Poor thresholds.

6 Score Calculation

Weighted model: Technical (25%), On-Page (25%), AI Visibility (30%), Performance (10%), Authority (10%).

22

About Odito AI

AI-powered SEO & Visibility Platform for agencies

Built for Agencies and In-House Teams

Odito AI is a next-generation SEO and AI Visibility audit platform designed for digital agencies and enterprise teams who need professional, white-label audit reports covering both traditional SEO and the emerging AI search landscape.

SEO Audit Engine
Full technical and on-page crawl with issue prioritisation and fix recommendations

AI Visibility Suite
GEO, AEO, AISEO scoring across ChatGPT, Perplexity, Gemini, and Claude

Knowledge Graph Audit
Entity detection, KG status, and structured data coverage analysis

Core Web Vitals
Desktop and mobile CWV with optimisation roadmap and impact forecasting

Keyword Intelligence
Position tracking, opportunity analysis, and search intent classification

White-Label Reports
Professional PDF reports with agency branding, fully customisable
